

Ph.D. Research Assistantships for Influenza Vaccine Development

The Biomedical Engineering Program, College of Engineering at University of Arkansas invites applications for two graduate research assistantships at the Doctorate level. These assistantships are available immediately for students in biomedical/bioengineering or cell molecular biology.

Research Areas: The selected candidates will pursue a Doctoral Philosophy degree in Biomedical Engineering to develop new influenza vaccines.

Stipends: The graduate assistantship stipend (12-month) plus tuition will be provided and renewed every year upon the satisfaction of academic performance.

Eligibility: Applicants must have Master or Bachelor degree in engineering or science and a grade point average (GPA) higher than 3.0 on a 4.0 scale from both bachelor's and master's level coursework and a GRE score higher than 1100 (Quantitative + Verbal). A TOEFL score is required if English is not student's native language.

Contact: Submit a resume indicating a GPA, GRE, TOEFL (if applicable), working or research experience, and a list of publications (if applicable), and the names and addresses of two references by email to:
